

ENERGY ACCELEROMETERS

Precision Accelerometers for Energy Exploration

Shanghai Bing Yin Electronics Company Ltd. (Shanghai Bing Yin) has been appointed as the exclusive global distribution partner for Honeywell Energy Accelerometers.

Honeywell's Q-Flex accelerometers feature a patented Q-Flex etched-quartz-flexure seismic system and their amorphous quartz proof-mass structure provides excellent bias, scale factor and axis alignment stability. In addition, we offer a modified Q-Flex accelerometer class designed specifically to tolerate the most demanding MWD and wireline environments (up to 200°C and high shock/vibration) while providing precision accuracy, stability and reliability. The QAT160's, QAT185's and Mini Q's are the core MWD sensors in this portfolio.

Shanghai Bing Yin is the exclusive global distributor of Honeywell energy accelerometers subject to the conditions in the agreement between Honeywell and Shanghai Bing Yin. Under the partnership, Shanghai Bing Yin shall provide Honeywell's high-precision solutions for the measurement-while-drilling (MWD) process that oil and gas companies use to create boreholes to explore and produce hydrocarbons. The Q-Flex accelerometers will be provided for oil and gas extraction to meet customers' needs from the global energy sector. In addition, Shanghai Bing Yin is Honeywell's authorized distributor for HGuide inertial navigation systems, pressure and magnetic sensors, and other Honeywell products in China.

Shanghai Bing Yin has offices in Canada and China, including Hong Kong. The company has warehouses across the USA, Canada and China, which enables their sales force to better serve customers around the world.

HOW TO ORDER

Orders, as applicable, for Honeywell Energy Accelerometers are expected to be placed directly with Shanghai Bing Yin.

Purchase orders to Shanghai Bing Yin must contain the following information:

- Purchase order number
- Part Number
- Complete end-user name and address
- Shipping method and account
- An appropriate requested date
- Correct pricing
- Work scope and reference to any applicable Honeywell program/ special pricing/sales bulletin (if any)
- All inquiries regarding order status should be directed to Shanghai Bing Yin

PRODUCT	PART NUMBER
QAT160	979-0273-0XX
QAT185	979-0275-0XX
MiniQ 150	979-0281-15X
MiniQ 185	979-0281-0XX
MiniQ 200	979-0286-00X
